

## ESSENTIAL OILS

### **Definition of a commercial grade (CG) essential oil:**

Commercial grade essential oils are oils that have had components either removed (by re-distillation) and/or added for reasons of safety, odor improvement or flavor improvement.

### **Definition of a certified organic (CO) essential oil:**

Certified organic grade essential oils are oils that have been extracted from components grown organically.

### **Definition of a pure grade (PG) essential oil:**

Based on the company's quality control system and laboratory analysis of the essential oils purchased, they have determined these oils to be pure and natural and not containing synthetic chemicals or non-natural adulteration components.

PG	Basil	CG	Palmarosa
