# Fragrance Suggestions for Triplet Candles

---

There are many intriguing and unique designs for candles. One creative and stunning approach to candle making is the Triplet Candle. Instead of using the typical one color and one fragrance, try a new twist to making a candle: use three separate colors layered on top of each other and give each color its own distinct fragrance. Below, you will find a list of Nu-Scents' suggested fragrance combinations that compliment each other well in a Triplet Candle. As an additional benefit, there is a color suggestion for each combination. Try using different tints and shades of the suggested color for a captivating effect or create your own color schemes to make a unique candle that is one in its own.
