

The Color Wheel

Primary—Three main colors that cannot be created by mixing other colors.

Secondary—A color created by mixing 2 Primary colors.

Tertiary—A color created by mixing 2 Secondary colors.

Complementary Colors—The Primary color and the Secondary color that are opposite each other on the color wheel (i.e. Yellow and Purple)

Hue—The pure color.

Tone—Hue + small amount of gray or opposite color (will mute or tone down the color)

Tint—Hue + White (will lighten the color)

Complement Tint—Tint + small amount of gray or opposite color (will mute or tone down the color)

Shade—Hue + Black (will darken the color)
